

WORLDWIDE TV SIGNAL FINDER

Compatible with digital or analogue signals on either VHF/UHF frequencies

**Tune in your caravan TV in less time it takes to make that first cup of tea...
FANTASTIC!!**

No matter how good your TV's channel search features, unless your aerial is aligned correctly, you will never enjoy the best possible reception.

Most caravanners and campers spend lots of frustrating time twisting and turning their directional aerials in an effort to find a good TV signal at their holiday location. Quite often the channels are limited in number and are of poor picture quality, because the aerial is not correctly aligned.

Finally! A simple solution is available – a smart, hand-held, signal finder.

Simply plug into your existing aerial system in your caravan, motor home or boat and with little effort the unit indicates the best direction to point your aerial. Within seconds you will achieve the best possible reception, giving truly professional results.

The Fringe VHF/UHF Worldwide Signal Finder is designed and manufactured in the UK by Fringe Electronics. For over 30 years Fringe Electronics have supplied professional TV installers and riggers with the highest quality signal amplification and distribution products. Fringe is proud to bring their renowned **QUALITY, RELIABILITY** and **TECHNICAL EXPERTISE** to the leisure industry.
